

Overall Expectations: Number Sense and Algebra

- Manipulate numerical expressions and solve first-degree equations

Learning Goal – “I will learn how to...”	Success Criteria – “To achieve the learning goal I need to be able to...”	Example	Practice Work	Self Assessment *I do not feel confident yet **I feel ok but still need practice ***I feel confident
Solve 2-step equations		$78 - 6t = 144$		
Solve equations with variables on both sides of the equal sign		$8x + 13 - 3x = -26 + 2x$		
Show a check for a solution				
Solve equations involving brackets		$4 + 3(2 - 3x) = 5(x + 2)$		
Solve equations involving fractions		$\frac{2x + 7}{4} - \frac{x}{3} = -\frac{1}{3}$		
Rearrange formulae with and without substitution				
Solve problems by setting up equations				
Review for my Summative	- Self Assess myself - Complete some or all of the review questions based on my self-assessment
